

HRMS

[Human Resource Management System]

Built with Roost Desktop using true microservice architecture

INTRODUCTION

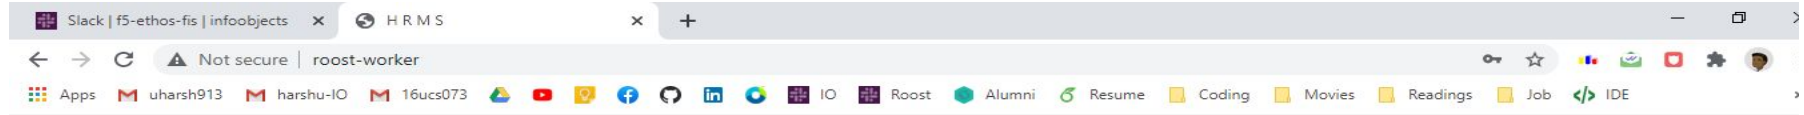

- Human Resource Management System is a platform to manage employees details in an organization.
- The software is built using microservice architecture hence is incredibly fast and extensible.
- A new yet powerful development tool Roost Desktop is used to build the software. Roost cloud native platform has a lightweight full-scale Kubernetes platform.
- Various features like collaboration, workload analytics, RKT etc made the development seamless and fast.

TECHNOLOGY STACK

- **Backend** - Spring Boot {Java}
- **Frontend** - HTML, CSS, JavaScript
- **Database** - Postgres
